

Lean Overview for Executives

- *Lean Overview for Executives provides company leaders or a management group with strategies for Lean implementation and development.*
- *Lean Leadership is a high-level, intensive look at the characteristics of successful leaders in Lean organizations.*

This one-day course presents the basic concepts of Lean manufacturing and the specific objectives of implementing Lean in the manufacturing environment. Content focuses on continuous improvement, strategies involved in successful Lean transformation, careful selection of organizational measurements, and defining a Lean growth strategy.
